RE: WC Docket 05-196

Subscriber Notification Report

Per the Federal Communications Commission (FCC) and its Enforcement Bureau's guidance, NetLogic is providing this Subscriber Notification and Acknowledgement Status and Compliance Report. We are addressing point by point the items required by the commission:

1. NetLogic has provided to each subscriber, existing and new, a letter describing the circumstances under which E911 services will not be available. This notification has been sent by email and US Postal Service mail, and was sent in two batches, the first on July 25, 2005, and the second on August 5, 2005. NetLogic has required all customers to mail or fax the letter back with a signature at the bottom acknowledging receipt and understanding of the information enclosed.
2. As of August 10, 2005, fifty-five percent (55%) of customers have returned the acknowledgement. NetLogic intends to follow up via telephone calls to the customers who do not return the notifications, and expects to receive acknowledgment from 100% of its customers by August 29, 2005.
3. NetLogic has printed appropriate warning labels and has sent its own technicians to its customer locations to affix these labels to NetLogic- provided equipment. This project is ongoing and will be complete by August 29, 2005.
4. NetLogic sent the advisory to all its VoIP customers.
5. NetLogic will begin to telephone customers that did not return the acknowledgement on or about August 17, 2005. Customers who do not return the signed acknowledgement form will be disconnected on August 30, 2005.
6. All acknowledgements are being kept on paper on file with the customer's contract information.
